DIRECTOR OF CENTRAL INTELLIGENCE
Committee on Imagery Requirements and Exploitation
Washington, DC 20505

DCI/ICS 85-4575
8 July 1985

Admiral W. McDonald, U.S. Navy
Commander in Chief
US Atlantic Command
Norfolk, VA 23511

Dear Admiral McDonald:

On behalf of the Committee on Imagery Requirements and Exploitation (COMIREX), I wish to express my appreciation for our most informative visit to CINCLANT Headquarters at Norfolk on 21-22 May 1985. The planning for and execution of the trip were both excellent. We were very much impressed with the dedication and professionalism of all those with whom we came into contact. I particularly want to express my thanks to CPT David Model, USA, LtCol Kirby Caysen, USAF, CDR Ed Tyree, USN, and CDR Gary Davidson, USN.

The visit permitted COMIREX to experience first hand the important contributions that imagery products make in supporting the many and varied responsibilities of the CINCLANT command.

The visit to the aircraft carrier USS AMERICA was clearly a highlight of the trip. This was a first for many of the participants and the group all came away with a much better appreciation of what is required to effectively support Fleet deployments and operations.

Again, please convey our thanks and appreciation to all the members of your staff who contributed to the outstanding success of this visit.

Sincerely,

[Signature Box]

Chairman
